

CØLDSTAR

CØLDSTAR

Tired of the local mainstream sound, the two-man crew around CØLDSTAR explores the vastness of the universe.

They jet at the speed of light through misty haze and black holes and experience fantastic journeys:

The two discover strange planets and cold stars, meet bizarre creatures and witness wacky space parties. They dance to unusual and new melodies.

CØLDSTAR saves the dark sounds in their logbook – they should no longer be withheld from the earthlings! Still on the flight back to earth, the duo sets out in their cruiser to fuse the captured sound waves with earthly sounds.

Just in time for the stopover on earth, CØLDSTAR have their first EP „Coming Home“ on board before the journey continues.
