

CØLDSTAR

OFF TO NEW ADVENTURES

Extinguished stars, foreign planets and black holes. Places beyond our imagination that arouse longings and invite us to dream. These are the themes that inspire Swiss duo CØLDSTAR.

CØLDSTAR consists of Martin Baumann and Michael Freund, who have another fascination besides their passion for dark and electronic music: space! Inspired by the dark and mysterious side of the universe, the two-piece have created their own aesthetic of danceable melodies and melancholic soundscapes. CØLDSTAR use analog synthesizers and vocoders from bygone eras.

Just in time for the stopover on earth, CØLDSTAR have their first album „CØSMIC DUST“ on board before the journey continues.
